📍 Berlin, Germany

I'm a software developer based on web and mobile application programming technologies. I use most of the new trending solution structures and the range increases every day in line with the requirements. I've been working on software development, product or service quality improvement, team leading, database architect, project development, system maintenance, and most digital industry needs with 15+ years of experience.

WORK EXPERIENCES

Runner

2016 - Today

I'm keeping myself dedicated as a full-stack solution developer, co-founder and consultant. There are small to medium sized companies, media agencies, teams, start-ups in my portfolio. I build solutions used by thousands as mobile applications, web applications, e-commerce platforms, IoT, SaaS etc. using modern frameworks, cloud services and new technologies.

Senior Software Developer

2008 - 2016

In the middle of my career, I started to work in well-known local and international digital agencies and companies as Senior Software Developer, Team Lead and Project Manager. I built e-commerce websites, digital products, SaaS platforms, industrial embedded software, market-places, web and mobile applications, mobile games, adver-games, websites with my teams.

- PING DIGITAL AGENCY (Saatchi & Saatchi)
- BONA DIGITAL AGENCY
- PLUS DIGITAL AGENCY
- BOND DIGITAL AGENCY & GAME STUDIO
- A CAMPUS YOUTH MARKETING
- ...tens of as a freelancer

Web Developer

2005 - 2008

I worked as a "Software Developer" for 3 years in local digital agencies and freelance. I improved .NET, Action Script skills and build web and desktop applications, websites with administrative functionalities.

Web Master

2003 - 2005

I initially started to work as a "Web Master" for about 2 years. I used ASP (Classic), Java Script, HTML, CSS, Flash to build web sites with administrative functionalities.
